

Mid Sem-1 progress review meeting

Deepti Aggarwal

[2012-09-05 Wed]

Work accomplished by Summer end

- All three published paper presentated.
- Study of related work for developing renarration service to Alipi, which includes: study of existing user profiles, user profile creation and their matching, rules to match the profile and renarration, algorithm to select the best renarration for a reader.
 - ① Looked at the implementation design and other related issues. Finalized the design and the work required to be done.
 - ② Completed the literature survey of user profiles.
- TAC work
 - ① Slot Filling task coding and documentation.
 - ② Entity Linking task coding and documentation.
- Power of Friends study and paper draft.

Work on renarration service for Alipi framework

- Chrome extension to provide ontology based user profile.
- Define user study for the the ontological service.
 - Domain to be tested: one of the Vlabs lab, may be PoPL.
 - Define the population sample who will consume the re-narrated pages (consumers). This can be defined in two dimensions:
 - Number of users using the developed user profile for browsing. Here, the emphasis is on the larger population sample of users.
 - Number of re-narrated pages each user has browsed. Here, the emphasis is on the number of re-narrated pages available as options for the users.
 - Define the re-narrators to re-narrate webpages using the developed profile.
- Working on the paper draft.

TAC work completion

- coding left for Entity Linking
- documentation of Slot Filling and Entity Linking

Power of Friends submission

- Finishing the draft of the paper followed by submission in OzCHI 2012.

Thesis completion

- Define thesis structure, flow of how to connect all the explored research areas with each other.
- Writing.

Renarration service for Alipi framework:

- 1 Plugin development: requires little work on user authentication from Alipi server.
- 2 Re-narration algorithm is implemented.
- 3 User study formulated.
- 4 Rough draft is ready.

TAC work:

Coding finished for Slot Filling and Entity Linking.

Power of Friends:

Paper submitted

Thesis writing:

- Flow finalised.
- Rough draft on objectives
- Introduction chapter started.
- One chapter draft on Knowledge extraction and validation is almost ready.

Paper on renarration service for Alipi framework

- conduct user study
- improvising the paper draft

TAC work documentation

- documentation of both Slot Filling and Entity-Linking task.

Thesis completion

- a rough draft of whole thesis

Deadlines to follow:

W4A 2013 (not announced yet)
